## PROTECTIVE FACE COVERINGS ARE REQUIRED

On June 15, 2021, California reopened and aligned with the CDC revised safety guidelines for those who are fully vaccinated against the coronavirus. The updated guidelines state that fully vaccinated people can resume most activities without wearing a mask or physically distancing. The new guidelines are not intended for healthcare settings.

**Due to this being a Healthcare Facility, our current safety guidelines have not changed, and we still require all individuals to wear masks inside all our facilities.**

As more people are vaccinated for COVID-19, it is still extremely important to maintain safety measures to help prevent the spread of the coronavirus. These precautions include wearing a face mask, practicing physical distancing, and washing your hands frequently with soap and water or using hand sanitizer that contains at least 60% alcohol.

**Once again, all patients will be required to wear masks when they visit our facilities, even if they are fully vaccinated.**
